

# Open for Online Ordering

Use DoorDash Storefront to power customized online ordering on your website

## Commission-free online ordering, simplified

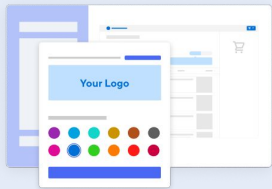

Whether it's for pickup or delivery, give your customers another way to order with a branded online ordering system that works for you.

We use your current DoorDash listing and your branding. After all, it's your menu, photos, logo, and story that customers crave.

### 4 quick steps to get started

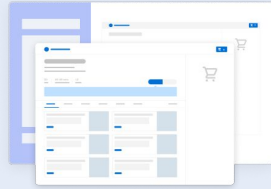

1

#### Customize

Pick your color scheme and upload your logo and header photo

2

#### Preview

Generate a preview link and review terms and fees

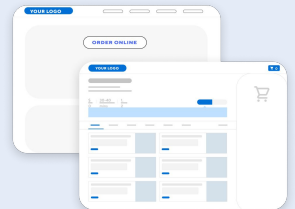

3

#### Create

Create your Storefront link and add it to your website

4

#### Launch

Get your staff ready and alert customers with our support guides

**Setup is a snap:** Complement your existing delivery, pickup, and dine-in systems because Storefront orders route exactly like DoorDash orders, so you don't need to train your staff on a new piece of software.

**Use your existing tools:** While Storefront takes care of orders from your website, the sales reporting, promotion creation tools, and customer data are all consolidated within the DoorDash Merchant Portal.
